

Problemset 9

Exercise 6:

G_5 :

$$i = 0$$

$$a_i = a_0$$

$$b_j : \begin{aligned} j &= 2i \bmod n \\ &= 2 \cdot 0 \bmod 5 = 0 \end{aligned}$$

$$b_j = b_0$$

$$i = 1$$

$$a_i = a_1$$

$$b_j : \begin{aligned} j &= 2i \bmod n \\ &= 2 \cdot 1 \bmod 5 = 2 \end{aligned}$$

$$b_j = b_2$$

...

Graph:

$$M = \{(a_0, b_0), (a_1, b_2), (a_2, b_4), (a_3, b_1), (a_4, b_3)\}$$

is a perfect matching

b)

With the formula: $\frac{n!}{(\frac{n}{2})!^2}$ • G_4 has 6 perfect matchings

$$\frac{4!}{(\frac{4}{2})!^2} = 6$$

• G_5 has 10 perfect matchings

$$\frac{5!}{(\frac{5}{2})!^2} = 10$$
